

CASE STUDY

Carriageway resurfacing a busy route

Client: East Riding of Yorkshire Council

Location: Market Weighton

Contract Value: £225,000

Contract period: 4 weeks

The site, on the A1079 road at Market Weighton, is the main route between Beverley and York and carries high volumes of traffic throughout the day. To minimise hold-ups, the work, which comprised planing and resurfacing, was arranged through a series of nightshifts.

We set up traffic management to allow one lane, two way traffic flow at all times while work was carried out swiftly and efficiently throughout the night. The traffic management system, carried out by our own workforce was designed to be instantly responsive to traffic conditions ensuring continuous vehicle movement.
