

# CASE STUDY

## Highway improvements to a tight timescale

**Client:** North East Lincolnshire County Council

**Location:** Humberston, near Grimsby

**Contract Value:** £450,000

**Contract period:** 8 weeks

The site was in a busy residential area on the outskirts of Grimsby with the carriageway improvements including several road junctions and a roundabout.

Our team planned and resurfaced 1200 square metres of carriageway, replacing kerbs, channels and gullies and installed anti skid surfacing.

To maintain traffic flow, and to minimise disruption to the residents, the contract period was limited to the 8 week period of the school summer holidays. Normally a contract of this scale and scope would warrant at least three times as long to complete.

With careful planning and committed input from the CR Reynolds team, we completed to schedule by literally working day and night. Our efforts achieved a zero complaints reaction from the community, and praise from the school.
